Security Managers are becoming more focused on Identity Management: Who people are, their employment affiliations, and specialized skills that help assure the safety and security of facilities. As a result, Real-Time Verification Solutions are being deployed to support the development of Trusted Communities.

Industry News

Nuclear power radiation risks nuclear terrorism nuclear facilities | homeland securitynewswire.com

Sensitive nuclear facilities face serious risk from insider threats. Security directors often lack information about disgruntled employees with malevolent intent and incidents that have happened in other facilities or industries. No organization is immune to such a risk. Workers in sensitive facilities require thorough background screening, continuous monitoring of watch lists and known associations, and tracking/auditing of secure access points. Contact RTTG to find out how a comprehensive Identity Management Solution can mitigate insider threats to your sensitive facility.

Deputy's Training Records Altered After Questionable Shooting | washingtonpost.com

Training record scandals compromise a LE agency's reputation and trustworthiness. Handwritten, unauthenticated, unsecured, un-audited training records fail to meet today's standards and expectations. Reduce liability and improve operational efficiency with Real-Time Verification identity management solutions.

New Jersey Lawmakers Consider New Medicaid IDs | RE:id

With over 1.3 Million people enrolled in NJ Medicare, putting their personal Identity information onto individual flash drives is a very risky endeavor, each flash drive leaves the entire database vulnerable to new attacks. Solution: Use an audit-able, permission-based identity management solution that protects privacy rights.

Solution Highlight

**UNIQUE, TRUSTED
FIRST RESPONDER COMMUNITY**

EPIC Emergency Personnel
Information Center
RESPONDERS

EPIC provides a secure, managed service that supports permission-based collaboration and need-to-know information sharing among local departments, county coordinators, regional response teams, state and federal agencies, and all the contractors who support response efforts.

EPIC enables local departments to:

- Maintain current professional certifications
- Alert members and/or training officers of expiring certifications
- Print, issue and manage department ID cards

EPIC enables scene commanders to:

- Optimally deploy responders based on verifiable skillsets
- Authenticate mutual-aid responders and their qualifications prior to granting access to hazardous environments
- Better control and audit access to incident scenes

Securely sharing this critical information through a highly accessible, Web-based system enables the most efficient use of limited resources, reduces risk, improves safety and security, and delivers immediate return on investment.

HOW IT WORKS

Company News

[SIA Government Summit](#); Security and the States Panel - Our CEO, Dan Krantz will participated in a panel discussion on emerging solution vulnerabilities and how to forge public-private partnership and unite the efforts of disconnected parties.

RTTG is working with MHSDA to support more cooperative efforts among Security and Human Resource Directors. We are excited to host an event on June 12th, where we will be facilitating an open discussion among NY Healthcare Facilities.

It is truly an honor and great privilege that our CEO, Dan Krantz, has been selected as the IT Advisor for the [Museum of the National Law Enforcement Officers Memorial Fund](#).

Dan Krantz gave a presentation entitled, "Who's Coming in Your Back Door?" at GovSec 2014, in Washington DC in May. Check our website for the video clip, coming soon!

Our aim is to send out a newsletter on a quarterly basis to advise you of industry related news, events and activities at RTTG. We encourage you to share your comments and feedback with our newsletter Editor at emoloney@realtimetg.com.

Team Member Highlight

Because of my intense work ethics, my goal prior to joining the RTTG team was to contribute my efforts towards something powerful. So I needed a company that had heart and integrity. RTTG seemed like the right place from the start, and I wanted in! What stood out was RTTG's unique pay-per-person business model, which demonstrated the company's commitment to customer success. This cost-effective pricing model proved integrity, by allowing any size company to benefit from their advanced solutions. I wholeheartedly believe that when a company focuses on a higher objective such as selfless customer service rather than profits, that success can and will be achieved. The opportunity to lead the industry with such confidence continues to intrigue me both intellectually and professionally. The idea of being with an entrepreneurial company, and having the ability to flexibly satisfy customer demands was a refreshing change.

So, with that excitement, I joined RTTG last April as Director of Customer Relations. As part of the RTTG Team, my focus is to build and nurture customer relationships. It is my job to meet with perspective customers, get to know them and their company's needs and goals. We discuss the challenges and threats they face, and help them to choose an identity management solution that meets their unique business requirements. What we do is very important, and it's an honor and a privilege to play an active role responding to the challenge of today's security threats. I enjoy being a part of the RTTG team because I am surrounded by the innovative thinking and the passionate support of outstanding technical and customer service team. This enables me to provide the best sales and support experience for my customers. I am truly excited to help lead the efforts of public and private organizations, working together to build trusted communities that assure the security of our great nation.

RTTG is fundamentally altering the Identity Management space – and I'm proud to serve in this capacity.
